Industries Served by DAC Consulting Services

DAC Consulting Services is a specialist consultancy delivering forensic engineering, expert witness services, forensic scheduling, and commercial dispute support across complex, high-value **industries** worldwide. With headquarters in London and a growing international presence, DAC combines deep technical expertise with a clear understanding of sector-specific operational challenges.

Our mission is to deliver exceptional outcomes by combining engineering precision, analytical rigor, and industry insight to support clients through disputes, claims, investigations, and arbitration proceedings.

Oil & Gas

The oil and gas sector operates in technically demanding and high-risk environments, where engineering failures, delays, and commercial disputes can have significant financial and operational consequences.

DAC Consulting Services supports upstream, midstream, and downstream operations with:

- Pipeline failure investigations and root cause analysis
- Offshore project delay analysis
- Refinery and processing plant disputes
- Quantum and cost assessment
- Expert witness testimony in arbitration and litigation

Our forensic engineering expertise ensures that technical failures are thoroughly examined, responsibility is accurately assessed, and claims are supported by robust engineering and scheduling evidence.

Power Generation

Power generation projects—whether coal, gas, nuclear, or hybrid systems—require precise coordination of engineering, procurement, and construction processes. Delays, defects, or performance issues can trigger complex contractual disputes.

DAC provides:

- Forensic delay and disruption analysis
- Performance failure investigations
- Engineering defect assessment
- Expert witness services in energy arbitration
- Commercial quantum analysis

Our specialists help stakeholders understand the technical and scheduling causes of project challenges while delivering independent, defensible expert opinions.

Renewable Energy

As global markets transition toward sustainable energy solutions, renewable projects introduce new technologies, supply chain complexities, and regulatory frameworks.

DAC Consulting Services supports solar, wind, and hydroelectric developments through:

- Construction delay analysis for wind and solar farms
- Defect investigation in turbine and panel installations
- Disruption and acceleration assessments
- Dispute resolution and expert witness services
- Risk evaluation for large-scale renewable infrastructure

Our forensic scheduling and engineering capabilities help project stakeholders resolve disputes efficiently while maintaining operational continuity.

Construction

Large-scale construction projects—whether public infrastructure or private developments—often involve multi-party contracts, tight timelines, and significant capital investment.

DAC specialises in:

- Construction expert witness services
- Forensic delay and disruption analysis
- Quantum and damages assessment
- Engineering defect investigation
- Arbitration and litigation support

From airports and bridges to metro systems and mixed-use developments, our team provides objective, evidence-based analysis to support fair dispute resolution.

Manufacturing

Manufacturing environments demand precision, efficiency, and operational continuity. Equipment failures, supply chain disruptions, and contractual disagreements can significantly impact productivity and profitability.

DAC Consulting Services offers:

- Root cause analysis of machinery and system failures
- Business interruption and DSU claim support

- Commercial dispute resolution
- Forensic scheduling and quantum analysis
- Expert testimony in complex industrial disputes

Our forensic investigations provide clarity in technically intricate disputes, ensuring that operational and financial impacts are accurately quantified.

Infrastructure

Infrastructure projects underpin economies and communities. Transportation networks, utilities, and public works require careful engineering coordination and long-term performance reliability.

DAC supports infrastructure stakeholders through:

- Forensic engineering investigations
- Delay and disruption analysis
- Cost overrun and quantum assessments
- Technical expert witness services
- Independent project performance evaluations

Our experience across transport, utilities, and civil infrastructure enables us to provide credible, technically sound expert support in high-stakes disputes.

A Tailored Approach Across All Industries

DAC Consulting Services understands that each sector presents unique risks, regulatory environments, and technical demands. Our approach is built on:

- Deep technical knowledge
- Independent and impartial expert analysis
- Clear, defensible reporting
- Strong experience in arbitration and litigation
- Global industry insight

With offices in London and international locations including Dubai, Miami, and Mexico City, we are positioned to support clients across jurisdictions and legal frameworks.

Forensic Engineering and Expert Witness Excellence

Whether addressing pipeline failures, construction delays, manufacturing disputes, or infrastructure cost overruns, **DAC Consulting Services** delivers:

- Forensic Engineering
- Forensic Scheduling

- Construction Expert Witness Services
- Commercial Expert Witness Support
- Forensic Delay and Quantum Analysis

Our team combines engineering expertise with legal and commercial awareness to deliver clarity in complex disputes and support successful outcomes for our clients.
